1.   Sales

1.1 Meth8 is sold as in-hand software using local, pay-to-play as metered by encrypted key.
1.2 The buyer prepays for logical steps as table look ups (lups) with example below.

2.   Pricing

2.1 Single user $97 for 10,000 lups. This is less than one cent per lup; for example:

logical expression: (p & q) > r ;
5 lups, numbered in order: 1 3 2 5 4   = $0.01

2.2 Student demo $27 for 1,000 lups. This is less than three cents per lup.

2.3 15 - 99 users -5%
2.4 100-199 users -10%
2.5 200-299 users -20%
2.6 300+ users   -40% [Trade discount for reseller with retail sales tax license.]

2.7 N propositional variables and N theorem variables (external look up tables), bid quote

2.8 What the buyer receives is an intelligent parser to find input mistakes (not metered as a lup) and a truth table for each step as printed to a unique file for that run, with the final table result also displayed to the screen monitor.

3.   Deliverables

3.1 The buyer receives two executable programs for 4 theorems (and 4 propositions) and 11 propositions;
3.2 Setup program for *one-time* install of both programs (the user emails or calls us with the setup code generated to which we supply the key file by email to complete the installation);
3.3 Key file contains encryption keys and in plaintext the meter counter.
3.4 Documentation of instructions for use; and
3.5 Annual support and maintenance are extra: by email +15%; or by telephone +25%.

4.   Risk management

4.1 A standard user agreement requires consent with as-is, disclaimer of warranty.
4.2 Acceptable use is one license per seat.
