New approach: Most of the papers we evaluate are found as articles at a private preprint system owned by Cornell Library. Since 2017 we found so many mistakes that now we opt to streamline our approach. These paper submissions are serialized by most recent digest number for our title with contents available by download. To view or download a file, please click on the titles below at <https://ersatz-systems.com/>

(The \$ symbol means a file was subsequently updated later than the embedded date in the file name.)

These papers as *continuously* updated are listed here for easy access:
